DETAILED ACTION

Claims 1 and 36-67 are pending in the instant application and are subject to the following lack of unity requirement.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1, 36-42, 48, 64, and 66, drawn to a process for preparing perindopril, or a pharmaceutically acceptable salt thereof.

Group II, claims 43-47, 56, 65, and 67, drawn to a process for preparing perindopril, or a pharmaceutically acceptable salt thereof.

Group III, claims 49-55, drawn to a process for preparing perindopril, or a pharmaceutically acceptable salt thereof.

Group IV, claims 57-63, drawn to a process for preparing perindopril, or a pharmaceutically acceptable salt thereof.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking the claims is the compound perindopril and prior art exists (US Patent No. 4,508,729) which discloses this compound. Therefore, the feature linking the claims does not constitute a special feature as defined by PCT Rule 13.2 as it does not define a contribution over the art.

Accordingly, Groups I-IV are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept. Therefore, unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered to be proper.
